

LUIS CORDOVA

Executive Vice Chair, Turbines

Director (Interim) Energy Operations for Generation, Austin Energy

Luis Cordova is currently the Director (Interim) Energy Operations for Generation, Austin Energy. He earned his bachelor's degree in chemical engineering from Texas A&M University - Kingsville in May 2006. In December 2012, Luis was granted a Professional Engineers license in the State of Texas focusing on Mechanical Engineering. He started working at Dow Chemical Texas City Operations as a Plant Engineer handling chemical reaction efficiencies and heat transfer performance. Luis then moved into power generation at Luminant Power where he was a Plant Engineer for Sandow Steam Electric Station, handling lignite transport, bottom ash, and condenser performance.

Luis joined Austin Energy as a Plant Engineer at Sand Hill Energy Center before moving to the Mechanical Engineering department, supporting the entire generation fleet. He moved back to Sand Hill Energy Center where he was the Supervising Plant Engineer and in 2019 moved to Plant Manager.
